Who we Are?

Sinetheta Engineering Group Ltd.—a 100% Ghanaian-owned electrical engineering firm with three decades of powering Ghana and Liberia with reliable electrical engineering solutions.

Innovation and excellence are at our core, driving sustainable progress across West Africa..

What We Do?

Our vision is to be a global leader in innovative engineering solutions that drive sustainable progress, uphold the highest standards of quality, and create lasting value for our clients, communities, and the environment.

Over the years, as a second-generation engineering firm, we have grown into a global and sustainability-focused brand without ever compromising on the excellence that has been our hallmark.

Core Values

- Innovation
- Excellence
- Safety
- Integrity
- Respect

Our Core Divisions

- Project Division

- Electrical Wiring Installation Services
- Electrical Consultancy Services
- Solar (PV) Installation and Post Installation Support
- Equipment Protection Installation Services
- Substation Design and Management, and more

- Commercial Division

- Retail of solar, electrical and mechanical accessories
- Wholesale of solar, electrical and mechanical accessories

- Training Division

- Solar Installation Training
- CEWP, CEWI Training
- CTVET proficiency I and II
- CCTV Installation
- Sustainable Financial Modelling

Service Capabilities Scope

Government Agencies

We deliver expert technical consultation and services to government agencies, fostering institutional development and driving progress in the fields of electrical engineering and sustainable energy.

Residential Clients

Empowering homes with innovative electrical engineering — for a cleaner, more sustainable tomorrow.

Commercial & Industrial Facilities

We specialize in advanced electrical systems for industrial and commercial facilities — from energy audits to system upgrades — ensuring reliability, compliance, and peak performance.

The African Market

Driven by our mission to serve Africa, we have expanded beyond Ghana and are proud to be making an impact in Liberia—marking the beginning of our broader continental footprint.

Competencies & Capabilities

Engineering Excellence

- Over 30 years of experience in delivering end-to-end electrical and solar engineering solutions.
- Expertise in grid-tied, off-grid, and hybrid solar installations.
- Proven track record with utility-scale projects and industrial clients.

Renewable Energy Solutions

- Design and deployment of clean energy systems for hospitals, banks, and commercial facilities.
- Customised solar solutions to reduce operational costs and carbon footprint.
- Pioneering hybrid systems that ensure energy reliability and efficiency.

Technical Competence

- Highly skilled engineers, technicians, and project managers with global certifications.
- Strong focus on safety, quality assurance, and compliance with international standards (IEC, NEC).
- In-house design and simulation capabilities using PVsyst, AutoCAD, and other advanced tools.

Project Management

- Robust project planning, procurement, and execution frameworks.
- Ability to scale projects across multi-site locations with decentralised solar infrastructure.
- Integrated logistics and after-sales support system.

Our Impact

With over 2,000 successful projects across Ghana and beyond — and a 99.99% completion rate — Sinetheta delivers proven impact. Our seasoned team brings deep expertise and flawless execution to every job, powering results that speak for themselves.

At Sinetheta, we believe knowledge shared is progress multiplied. Our commitment to training and skills development has empowered over 1,000 apprentices through our dedicated training division, building strong local expertise in electrical and solar engineering across Ghana and the wider African region.
